5. ADJUSTMENTS

< For this Adjustments, combined model DA-T750 (T755/T550/T550L/T555) or regulated DC power supply is required. >

• Presetting

If DA-T750 (T755/T550/T550L/T555) is used, connect DC power cord of the unit to DC OUT jack of DA-T750 (T755/T550/T550L/T555). If regulated DC power supply is used, connect it to the unit as Bottom view on page 5.

5-1. Adjustment of the Auto Return

- 1) The adjusting screw in top view is one to adjust the position of Auto Return when stylus reaches lead-out groove.
- 2) Make adjustment of the screw in such a way that stylus lifts up automatically around the middle way of lead-out groove. Namely turn the adjusting screw clockwise is for lagging and counterclockwise is for leading.
- 3) After adjusting the screw properly, check its operation a few times.

5-2. Adjustment of the Clearance between Stopper and Micro Switch

After replacing the micro switch, adjust the clearance between Stopper and micro switch (See Fig. 5-1) to be approximately 0.3 mm.

5-3. Adjustment of the main gear

When the main gear makes abnormal mechanical noise caused by touching to the pinion gear during playing record disc, adjust its position with cam to make even clearance between the circular arc portion of the main gear and the pinion gear.

5-4. Speed Adjustment

• See Bottom View on page 5.

STEP	SPEED SELECTOR	ADJUST	ADJUST FOR
1.	33-1/3 r.p.m.	eVR1 (F-5249)	Strobo marking pattern appears to stand still.
2.	45 r.p.m.	eVR2 (F-5249)	Same as above
